Positively No Credit.

My reasons As the market business is now conducted the rash customer does not gain one cent over the person with his wife understoon with his wife but 32. They separated and Mrs Hubbard went to leve with his paragraph of the disapproval of Mr Hubbard with his wife on seem to be understoon with the considerable attention of late, much to the disapproval of Mr Hubbard, who was in the city, endeavoring to bring who buys on long credit. Is this right? Should it be so is if done in any other line of business? Furthermore, can reasoned and my labbard were living on the pure many should not many other line of business? Furthermore, can and Gorenth were living on the pure ment entered into conversation with his wife understoon while the solution of Runip Steak, Beef Roast, Chicken, Lumb, etc.

In what I say let it be understood; that I speak only for myself. I will neither work nor your for Senator Hill for Governor. My indictment against him has two coupts. First, I maintain that two coupts. First, I maintain that from March 4, 1993, he has done everything he could to harrars, annoy said obstruct the Democratic Administration here.

Second, I regard him as primarily responsible for the offense in the State of New York for which Judge Maynard was tried and convicted last year. The only real defense Judge Maynard had was tried and convicted last year. The only real defense Judge Maynard had was tried and convicted last year. The only real defense Judge Maynard had was tried and convicted to do what he did by the overpowering inductor of David Bennett Hill. I will note for no man connected with that calme.

I do not see how Judge Gaynor can accept after the treatment of the contested delegation from Kings County. Mir. Lockwood's nomination for Lieutenant Governor I regard as an admirable one. I shall only regret it if he is associated on the ticket with Senator Hill.

Suppression of Vice In the Four Hun dred" would out at the very rost of the evil of which they complain, whereas the step they are taking now can only trim off some of the topmost boughs?

There is without doubt a certain amount of reckless newspaper writing going on which every one abominates and every one reads.

This writing keeps pace with the doings of the day. It is often inaccurate,

vinlear and malicious; but on the other hand, there is so much social evil doing that never finds its way into print at all that the score is pretty even up to date.

I could mention the names of hundreds of prominent New York and Boston families who have never had cause to complain of a single line or word rinted to their derogation.

And why? Simply because they have

over given the opportunity.

While not making a pled for the soci-y reporter or the scandal loving edi-r I am sufficiently familiar with their n ethods to know that they would just as lief print good news of prominent people as bad news. Bad news sells botter than good news,

of course. In times of war, tempest, famine, fire and flood the demand for ewspapers doubles and trebles. So it does in times of great social dis-

elopement of Herbert Pell and Mrs. Kate Kernochan, the divorce of Mr. and Mrs. Fernando Yznaga and the subsequent matriage of both, the Drayton standal, the Vanderbilt imbroglio, the Gould flasco—all these stirring jucidents in social life, and thousands of others for which I haven't space, con-titute the gossip of the day which is on every one's lips, and which can no more be kept out of the newspapers than a fluck can be kept out of water or Ward McAllister out of print.

and his pretty playmates to begin to trim ship before they yell that they are

overpowered by water.

I cannot predict any success for the new society with the object of suppressing bad news about fashionable people.
Murder will out—so will adultery,
drunkenness, chearing at cards, dishon-

deman publicity has only to ponder for a moment upon all it does that is not printed and be grateful on its marrow bones that such matters are still per-sonal and have not yet become of public nterest.—Cholly Knickerbooker in New York Recorder.

AN INTERESTING SLAB,

all Mexico at the coast has been rought to the city to be dressed up. For years that monument has been a point of interest and has been visited by thousands of citizens and strangers. Each has apparently felt that no one would believe ho or she had been there if some portion of the slab were not car ried away to be offered in evidence on

The result has been that the marble The result has been that the marrie has been chipped and defaced until its original form is almost lost. It is because of all this that the slab was brought to, the city. To work out the offscements the surface would have to be worked down two inches. When re-

ressed, the stone will again be placed n position, but this time it will be pro-ected by a fence of steel pickets. The nclosure will be 12 feet square. The pickets will be 8 feet high, the lops happy pointed and leaning inward, after the device of some rattraps, so that while it might be possible for an active person to climb in it would require a first class acrobat to climb ou over those curving pickets. Besides this a new law makes it a possal offense to

Until comparatively recently the subsades escaped the ruthless hands of Pulsados escaped the ruthless hands of confractors and quarrymen, despite the fact that there are few spots in the country where richer deposite of granite are to be found. A few quarries within the last five years have spring up at Fort Lee, but they have all been located away back from the Palisades, and the front of these beautiful hills have been unnolested. Now, however, a firm of contractors, by expleding dynamite, 3,000 pounds at a time, is gradually making lung excavations in front of the Palisades, which will in the course of a very few months transform the historic Palisades from thigs of beauty to ordinary stone quarries.

### LABOUCHERE KICKS.

What Some Folles Call Generosity He Delares Is a "Monstrous Job." The queen's generosity in providing

palaces and other residences for foreign princes and princesses at the expense of the British taxpayer is again rousing the ire of Radicals, says a London let-ter. The scandal has hardly subsided over the thrifty pensioners of her majesty, who have been turning Hampton Court palace into a bourding house, when now it is announced that she has been pleased to grant the studhouse, also at Hampton Court, to Princess Fred erica of Hanover and her husband, with the benefit of the survivorship. The princess is one of the wealthiest person-ages in Europe, and she only rarely comes to England for a brief visit. It is announced that the studhouse is to be extensively repaired and improved for per occasional occupation. This move Mr. Labouchere to remark:
"If this arrangement has really been

made, it is a most monstrous job, and one of a peculiarly objectionable kind, as during the reigns of George IV and William IV parliament protested so strongly against such reversionary grants that they were altogether discon-tinued of late years. However, the queen has privately revived the system of giving royal residences with survivor-ship, and I am informed that nearly every warrant which has recently been granted has contained the obnoxious re versionary clause. The next sovereign of these realms will have to live a long time before he has either houses

queen has signed a warrant granting what really was an official residence to the wife of the present occupant in case she survives her husband."

"What is the probable loss from the fire on pine slimpings throughout the state?" was asked of a leading logger. "The loss is 'in one sense nominal," explied he. "You understand, fire does not burn the body of a pine tree. It only have soff the lark and foliage. The burns off the burk and foliage. The trunk of the burned tree is as good as ever it was, with this exception—the tree, after it is burned, must be cut the

succeeding winter, else it will become worm easen and worthless. "This fire is a blessing in disguise to labor. Every owner of burned pine stumpage must go to work this country winter and ent every foot of it, and nany of these owners are forced to cut purhaps hundreds of millions of feet o tampage they would not otherwise have cal for years to come. They are, you see, forced to employ immense crews of men they would not otherwise have had ase for."—St. Paul Globe.

The ezar has just issued his approval of the institution of ducting in the army. The commander in chief at Kiev, in issuing the new ducting code, says: "The coar has conferred upon us a new heart of his imperial grace in granting as the right to defend with arms in our lands that which is next present to all hands that which is most precious to all of us-our honor. This gracious act on the part of his majesty makes it our duty, still more than heretofore, so to regulate our conduct and manners alike in official and social intercourse as to obviate all interior misunderstandings and frivolous quarrels."—Moscow Let
